Verify

- **Processor:** 6-core **3.5 GHz** minimum required
- **RAM:** high-speed **DDR5 memory** preferred
- **Disk Space:** at least 100 GB for **open-world** titles
- **Graphics:** DLSS 3 / FSR 3 **frame generation** compatible chip

Game Freak delivers an ambitious, next-generation post-apocalyptic action RPG set in a beautifully ruined, overgrown futuristic vision of Japan. Explore volatile, highly demanding open environments alongside a loyal canine companion while utilizing advanced dynamic tactical mechanics to dismantle colossal boss entities. The breathtaking visual presentation leverages cutting-edge physics and particle systems, pushing modern high-end graphics cards to their absolute technical limits. Uncover deep existential mysteries within an emotional narrative sandbox built to deliver true next-gen graphical fidelity and immersive exploration.
