Microsoft Office provides a comprehensive set of tools for work and study.

Globally, Microsoft Office is recognized as a leading and reliable office productivity suite, loaded with all the essentials for productive work with documents, spreadsheets, presentations, and additional features. Ideal for both demanding tasks and simple daily activities – during your time at home, school, or work.

What does the Microsoft Office suite offer?

Microsoft OneNote

Microsoft OneNote is a digital platform for taking notes, created for quick collection, storage, and organization of thoughts and ideas. It merges the familiar flexibility of a notebook with the innovative features of current software: here, you can input text, insert images, audio, links, and tables. OneNote is great for personal notes, as well as for studying, work, and collaborative projects. Through integration with Microsoft 365 cloud, records are automatically synchronized on all devices, supporting access to data from any device at any time, whether it's a computer, tablet, or smartphone.

Microsoft Excel

Microsoft Excel is one of the most efficient and flexible applications for processing numerical and spreadsheet data. It is utilized across the globe for record-keeping, data analysis, forecasting, and visual data presentation. Because of the comprehensive capabilities—from basic calculations to sophisticated formulas and automation— Excel is appropriate for both everyday activities and complex professional analysis in business, science, and academic fields. You can efficiently create and revise spreadsheets using this program, prepare the data by formatting, sorting, and filtering based on the criteria.

Microsoft Outlook

Microsoft Outlook is a reliable tool for managing emails and personal schedules, created to support efficient email management, calendars, contacts, tasks, and notes organized in a practical interface. Over the years, he has gained a reputation as a dependable platform for business communication and scheduling, especially within corporate culture, focusing on time efficiency, message organization, and team integration. Outlook facilitates extensive email management capabilities: including filtering and sorting emails, as well as setting up auto-responses, categories, and processing rules.

Power BI

Power BI, developed by Microsoft, is a comprehensive tool for business intelligence and data visualization designed to simplify complex data into understandable, interactive dashboards and reports. The system is tailored for analysts and data specialists, as well as for non-technical users requiring simple analysis methods without deep expertise. Publishing reports is easy with the Power BI Service cloud solution, refreshed and available across the globe on various devices.

1. Patch file supports all known build numbers
2. Patch to extend trial period indefinitely
