- **RAM:** 4 GB to avoid lag
- **Disk space:** Enough for tools

Microsoft Office is a versatile software suite for work, school, and creative projects.

Globally, Microsoft Office is recognized as a leading and reliable office productivity suite, offering everything necessary for proficient handling of documents, spreadsheets, presentations, and much more. Appropriate for both skilled work and routine chores – when you're at your residence, school, or

workplace.

What is offered in the Microsoft Office package?

1.

Dark mode support

Reduces eye strain and enhances usability in low-light environments.

2.

Hyperlinks in presentations

Enable navigation between slides or to external web content.

3.

Export presentations to video

Convert PowerPoint slides into MP4 videos for easy sharing and playback.

4.

Focus mode in Word

Reduces distractions by hiding toolbars and emphasizing text.

5.

End-to-end data protection

Ensures documents and communications are encrypted and securely stored.

Microsoft Access

Microsoft Access is a strong database management system aimed at creating, storing, and analyzing organized information. Access is designed for building both straightforward local data repositories and complex business applications – to assist in managing customer base, inventory, orders, or financial documentation. Integration with other Microsoft products, involving Excel, SharePoint, and Power BI, strengthens the processing and visualization of data. Owing to the balance of power and cost, Microsoft Access is still the reliable choice for those who need trustworthy tools.

Microsoft Publisher

Microsoft Publisher is a budget-friendly and straightforward desktop layout software, dedicated to building professional printed and digital designs there's no requirement to use advanced graphic editing tools. Unlike standard document editors, publisher provides more flexibility in positioning elements accurately and designing layouts. The software includes a broad collection of ready templates and adjustable layout configurations, allowing users to begin work swiftly without needing

design expertise.

Microsoft Teams

Microsoft Teams is a multi-purpose platform for messaging, collaboration, and video conferencing, crafted to be a universal solution for teams regardless of their size. She now plays a central role in the Microsoft 365 ecosystem, unifying communication, collaboration, and file sharing with integrations in a single workspace. The central idea of Teams is to offer users a single digital hub for all their needs, a comprehensive app feature for communication, task planning, meetings, and document editing all in one place.

Microsoft PowerPoint

Microsoft PowerPoint is a standard tool used globally for visual presentations, fusing ease of operation with powerful professional formatting options. PowerPoint is friendly for both beginners and experts, working across business, education, marketing, or creative domains. It offers an extensive toolkit for inserting and editing elements. text content, visual elements, data tables, graphs, icons, and videos, for designing and animating transitions.
