Microsoft Excel

Excel by Microsoft is among the most robust and adaptable tools for handling numerical and spreadsheet data. Across the world, it is used for reporting, analyzing information, making forecasts, and visualizing data. Due to its broad capabilities—from basic calculations to complex formulas and automation—for everyday use and professional research or analysis, Excel is an excellent choice in business, science, and education. The program simplifies the process of making and editing spreadsheets, format the data according to specified criteria, and perform sorting and filtering.

Power BI

Power BI is a comprehensive data visualization and business intelligence platform developed by Microsoft crafted to convert disjointed information into accessible, interactive reports and dashboards. The tool is designed for analysts and data specialists, for common users seeking user-friendly analysis tools without requiring detailed technical knowledge. Publishing reports is made simple by the Power BI Service cloud platform, updated and available from any location globally on various gadgets.

Microsoft Teams

Microsoft Teams functions as a multi-use platform for messaging, collaboration, and online meetings, engineered to serve as a universal solution for teams of any size. She has established herself as a core element of the Microsoft 365 ecosystem, uniting chats, calls, meetings, file exchanges, and integrations with various services in one workspace. Teams' primary objective is to create a unified digital platform for users, where you can chat, coordinate tasks, hold meetings, and collaboratively edit documents—all within the app.
