Microsoft Office supports all your work, study, and creative needs.

Microsoft Office is considered one of the most prominent and dependable office solutions globally, comprising everything needed for smooth work with documents, spreadsheets, presentations, and other tasks. Designed to serve both professionals and casual users – at your residence, school, or job.

What are the components of the Microsoft Office package?

Skype for Business

Skype for Business is a professional platform for online communication and cooperation, combining instant messaging, voice/video calls, conference calls, and file sharing tools within a consolidated secure solution. Developed as a corporate version of Skype, expanding its original features, this system furnished businesses with tools for efficient communication within and outside the organization following the company's requirements for security, management, and integration with other IT systems.

Microsoft Visio

Microsoft Visio is a dedicated software for designing diagrams, schematics, and visual representations, used to depict complex information in a clean and structured presentation. It is vital for showcasing processes, systems, and organizational arrangements, visual plans of IT infrastructure architecture or technical drawings. The software supplies an extensive collection of pre-designed elements and templates, which are easy to reposition on the workspace and connect, crafting structured and readable schemes.

Microsoft PowerPoint

Microsoft PowerPoint is a dominant tool for producing visual presentations, blending simplicity with advanced features for professional design and delivery. PowerPoint is suitable for both those just starting out and seasoned users, working in the sectors of business, education, marketing, or creativity. The software offers a large variety of tools for insertion and editing. text, images, tables, charts, icons, and videos, for creating smooth transitions and animations.
