Microsoft PowerPoint

Microsoft PowerPoint is a trusted software for designing presentation graphics, fusing ease of operation with powerful professional formatting options. PowerPoint accommodates both novice users and experienced professionals, working in the domains of business, education, marketing, or creativity. It offers an extensive toolkit for inserting and editing elements: text-based content, images, data tables, graphs, icons, and videos, to facilitate transitions and animations.

Skype for Business

Skype for Business is a business platform designed for communication and online interaction, that integrates instant messaging, voice and video calls, conferencing, and file exchange as part of a unified safety approach. An enterprise-focused adaptation of the traditional Skype service, this system enabled companies to communicate effectively both internally and externally in accordance with corporate standards for security, management, and integration with other IT systems.

Microsoft Excel

Microsoft Excel is considered a top-tier tool for handling numerical and spreadsheet data efficiently. It is employed internationally for record management, data analysis, prediction, and visualization. Because it offers extensive possibilities—from straightforward calculations to complex formulas and automation—for everyday use and professional research or analysis, Excel is an excellent choice in business, science, and education. Easily build and revise spreadsheets using this software, customize the formatting of the data, then sort and filter it accordingly.
