Recognized for advanced encryption and compliance with global standards.

Microsoft PowerPoint

Microsoft PowerPoint is a trusted software for designing presentation graphics, integrating user-friendly operation with robust options for professional information presentation. PowerPoint is suitable for both beginners and experienced users, working in business, education, marketing, or creative fields. This application includes a wide range of tools for inserting and editing content. text, images, tables, charts, icons, and videos, as well for transitions and animations.

Microsoft Publisher

Microsoft Publisher is a budget-friendly and straightforward desktop layout software, centered on creating visually compelling print and digital materials you can avoid using sophisticated graphic applications. Unlike traditional editing platforms, publisher facilitates greater freedom to position elements exactly and work on the design. The platform offers a range of ready-made templates and flexible layout configurations, helping users to rapidly get up and running without design skills.

Power BI

Power BI by Microsoft is a robust platform for business intelligence and data visualization developed to reshape isolated data into clear, engaging reports and dashboards. The tool is suitable for analysts and data experts, as well as for non-technical users requiring simple analysis methods without deep expertise. Power BI Service makes publishing reports quick and easy, refreshed and accessible worldwide from different devices.

1. Key generator compatible with OEM, retail, and volume licenses
