Microsoft Office enhances productivity and creativity at work and school.

Across the world, Microsoft Office is known as a leading and reliable office productivity suite, offering all the tools required for productive management of documents, spreadsheets, presentations, and other functions. Designed for both professional use and everyday purposes – in your house, school, or work premises.

What software is included in Microsoft Office?

Microsoft Access

Microsoft Access is a versatile database management tool used for designing, storing, and analyzing structured datasets. Access is a good choice for creating small local databases or more complex business management tools – for maintaining a client database, inventory, order tracking, or financial records. Integration capabilities with Microsoft solutions, featuring Excel, SharePoint, and Power BI, extends data processing and visualization tools. Owing to the balance of power and cost, Microsoft Access remains the reliable solution for users and organizations alike.

Microsoft Publisher

Microsoft Publisher provides an accessible and easy-to-learn desktop publishing platform, intended for crafting professional-looking print and digital assets no need to use complex graphic software. Unlike typical document editors, publisher offers users more opportunities for detailed element arrangement and design work. The software includes a broad collection of ready templates and adjustable layout configurations, allowing users to instantly commence work without design background.

Microsoft Visio

Microsoft Visio is a specialized application used for graphical representations, diagrams, and models, that facilitates displaying detailed information in a transparent and organized manner. It is highly useful for portraying processes, systems, and organizational frameworks, technical architecture or drawings of IT infrastructure depicted visually. The program features a plentiful library of ready-to-use elements and templates, simple to transfer to the workspace and connect among themselves, forming well-structured and clear schematics.
