Microsoft Office is a reliable suite for work, learning, and artistic projects.

Microsoft Office ranks as one of the most trusted and widely used office software worldwide, providing all the necessary components for effective work with documents, spreadsheets, presentations, and more. Designed to serve both professionals and casual users – in your home, educational institution, or workplace.

What's included in the Microsoft Office software?

Power BI

Power BI is Microsoft's advanced platform for business intelligence and visual data analysis created to organize fragmented information into coherent, interactive reports and dashboards. The tool is designed for analysts and data specialists, aimed at ordinary consumers seeking easy and understandable analysis tools without technical skills. Publishing reports is made simple by the Power BI Service cloud platform, refreshed and accessible from anywhere in the world on multiple gadgets.

Microsoft Publisher

Microsoft Publisher is a user-friendly and inexpensive solution for creating desktop layouts, specialized in designing professional print and digital materials refrain from using complicated graphic software. Unlike conventional writing programs, publisher enables more accurate element placement and enhanced design capabilities. The program features an array of pre-designed templates and modifiable layout arrangements, enabling users to promptly start working without design proficiency.

Skype for Business

Skype for Business is an enterprise solution for communication and remote interaction, bringing together messaging, voice/video calls, conference capabilities, and file transfer in a single solution under one safety protocol. Developed as an extension of classic Skype but tailored for the business environment, this system assisted companies in achieving better internal and external communication following the company's requirements for security, management, and integration with other IT systems.
