Microsoft Office is a dynamic set of tools for professional, academic, and artistic work.

Microsoft Office is among the top office suites in terms of popularity and dependability worldwide, featuring all the tools needed for efficient handling of documents, spreadsheets, presentations, and other work. Perfect for professional projects and everyday errands – in your home, educational institution, or workplace.

What services are included in Microsoft Office?

Microsoft OneNote

Microsoft OneNote is a digital note-taking app built for fast and simple collection, storage, and organization of thoughts, notes, and ideas. It pairs the straightforwardness of a notebook with the technological sophistication of modern software: here, you can write text, insert images, audio files, links, and tables. OneNote is a versatile platform for personal notes, learning, work assignments, and team projects. With Microsoft 365 cloud integration, your records automatically stay synchronized on all devices, making data available everywhere and at all hours, whether on a computer, tablet, or smartphone.

Microsoft Teams

Microsoft Teams is a powerful platform for chatting, collaborating, and conducting video conferences, engineered to serve as a universal solution for teams of any size. It has evolved into an important element of the Microsoft 365 ecosystem, offering an all-in-one workspace with messaging, calling, meetings, file sharing, and service integration features. Teams' fundamental aim is to offer users a unified digital platform, the platform for chatting, task coordination, meetings, and document editing, all within the application.

Microsoft Excel

Microsoft Excel is a highly effective and versatile program for managing quantitative and tabular data. Globally, it is employed for generating reports, analyzing information, making predictions, and visualizing data. Thanks to the extensive capabilities—from simple calculations to complex formulas and automation—Excel is perfect for simple daily activities and professional data analysis in business, research, and academia. With this software, creating and editing spreadsheets is quick and easy, style the data according to the criteria, then perform sorting and filtering.
