Microsoft OneNote

Microsoft OneNote is a digital notebook designed for quick and easy collection, storage, and organization of any thoughts, notes, and ideas. It fuses the ease of a standard notebook with the functionalities of advanced software: this is the place to input text, embed images, audio, links, and tables. OneNote is suitable for personal notes, educational purposes, work, and shared projects. With Microsoft 365 cloud integration, your records automatically stay synchronized on all devices, allowing data to be reached from any location and at any moment, whether on a computer, tablet, or smartphone.

Microsoft Word

A powerful text editor for creating, editing, and formatting documents. Offers a multitude of tools for dealing with text blocks, styles, images, tables, and footnotes. Allows real-time collaboration and offers templates for rapid setup. With Word, it's simple to develop documents either from scratch or by using one of the numerous templates provided, from professional resumes and cover letters to comprehensive reports and invitations. Customizing fonts, paragraphs, indents, line spacing, lists,

headings, and formatting styles, supports the development of clear and professional documentation.

Power BI

Power BI is a powerful business analytics and data visualization platform from Microsoft built to translate dispersed data into comprehensible, interactive dashboards and reports. This tool caters to analysts and data experts, and for typical users who want clear and easy-to-use analysis solutions without in-depth technical understanding. Power BI Service cloud enables simple and efficient report publishing, refreshed and reachable across the globe on multiple devices.

Microsoft Teams

Microsoft Teams is an all-in-one communication platform for teamwork, messaging, and video calls, created as a versatile tool for teams of all sizes. She has established herself as a vital element of the Microsoft 365 ecosystem, integrating messaging, voice/video calls, meetings, file exchanges, and other service integrations in one platform. The central idea of Teams is to offer users a single digital hub for all their needs, where you can interact, plan, meet, and edit documents collectively—without leaving the application.
