- **Disk space:** Free: 64 GB

Microsoft Office enhances productivity and creativity at work and school.

One of the most reliable and popular office suites across the globe is Microsoft Office, equipped with everything required for productive work with documents, spreadsheets, presentations, and additional tools. Works well for both industrial applications and personal use – at home, during school hours, or at work.

What services are included in Microsoft Office?

Microsoft Access

Microsoft Access is a comprehensive tool for managing databases, designed for creating, storing, and analyzing structured information. Access is ideal for building small-scale local databases as well as advanced business systems – for overseeing customer data, inventory control, order management, or financial reporting. Working in conjunction with Microsoft solutions, consisting of Excel, SharePoint, and Power BI, increases the efficiency of data processing and visualization. Through the integration of power and affordability, for those who need reliable tools, Microsoft Access continues to be an excellent option.

Microsoft Excel

One of the most comprehensive tools for dealing with numerical and tabular data is Microsoft Excel. It serves worldwide purposes such as reporting, data analysis, forecasting, and data visualization. Because of the comprehensive capabilities—from basic calculations to sophisticated formulas and automation—Excel works well for daily chores as well as advanced analysis in business, research, and teaching. The tool supports simple creation and editing of spreadsheets, convert the data into the required format, then sort and filter it.

Skype for Business

Skype for Business is a business platform designed for communication and online interaction, that brings together messaging, voice/video calls, conference functionalities, and file exchange in the scope of one secure method. Tailored for the business environment, as an extension of Skype, this system equipped companies with resources for smooth internal and external communication taking into account the company's policies on security, management, and IT system integration.

Microsoft PowerPoint

Microsoft PowerPoint is a broadly acknowledged software for developing presentation slides, combining straightforwardness with comprehensive professional formatting tools. PowerPoint supports both beginner and advanced users, engaged in business, education, marketing, or creative work. This program delivers a wide array of functionalities for insertion and editing. text, images, tables, charts, icons, and videos, for designing and animating transitions.
