Microsoft Visio

Microsoft Visio is a software application for making diagrams, charts, and visual models, used to depict complex information in a clean and structured presentation. It is uniquely suited for representing processes, systems, and organizational architectures, visual representations of technical drawings or IT infrastructure architecture. The software provides an extensive collection of pre-designed components and templates, that are straightforward to drag onto the work area and interconnect, creating clear and understandable schematics.

Microsoft Access

Microsoft Access is an efficient database platform developed for building, storing, and analyzing structured data. Access is suitable for designing both simple local databases and complex enterprise applications – to maintain records of clients, inventory, orders, or financial activities. Seamless integration with Microsoft tools, such as Excel, SharePoint, and Power BI, boosts capabilities for data handling and visualization. Owing to the blend of strength and affordability, users and organizations who need dependable tools still favor Microsoft Access.
